

CAR BATTERY INSTALLTION

Remove battery cover from the underside of the car with a philips head screwdriver (not included) as shown.

Insert (1) AAA batteries (not included) as shown in battery compartment, and replace battery cover.

To check, press button on bottom of car and be sure wheels spin and LED lights turn on.

TRACK SETUP

1

Take any two pieces of track, and line up the top tabs and bottom tabs.

2

Push together until you hear a "click." Continue until you have a track as long as you like.

3

Shape the track any way you want by simply turning pieces in different directions.

4

Finish the track by connecting your beginning piece with your end piece.
