5. APP Operation Steps:

* Before using the APP, you need to turn on the Bluetooth function of your mobile phone for normal operation. If it is not turned on, please click "Go to Settings" and follow the prompts to turn on Bluetooth. After the connection is successful, the light will flash once.

1. Scan QR code to download the software—click "smart light"—select the desired product—click to enter
2. Use the "..." function key at the top right of the APP to set up and add multiple lamps to connect to the device

6. Questions&Answers

1. Why can't the app connect to the device or operate? answer:
 - (1)Please confirm the device is turned on.
 - (2)Please confirm that the wall switch connected to the lamp is turned on.
 - (3)Please confirm that the lamp is not connected to other devices.
 - (4)If the lamp cannot be connected for a long time, Please turn off the wall switch connected to the lamp, then turn it on, and restart the device Bluetooth and app, then clear the device cache.
2. Why does it show that my device connected to the lamp, but can't control it?
 - (1)Please confirm that the selected lamp group on the device is the one you want to control.
 - (2)Please confirm that the lamp on the APP is turned on.
3. Why is the wall switch of the lamp turned on, sometimes I can't find my lamp on the APP? answer:
 - (1)Since the device and the lamp take a while to run and connect, it usually appears in the APP after a few seconds. If it does not appear, close the APP and restart.
 - (2)Please confirm that the lamp is not connected to other devices.
